Dear Hiring Manager,

I am writing to express my interest in a leadership position within your IT and technology team. With over 13 years of international experience in IT infrastructure, cloud solutions, cybersecurity, and DevOps, I bring a proven track record of designing and managing secure, scalable environments for financial and enterprise systems.

Currently serving as Head of Infrastructure, Security & DevOps at MFSYS Technologies, I lead cross-functional teams overseeing cloud migrations (AWS, Huawei), Tier-3 data center operations, and full DevOps lifecycle implementations. My consulting portfolio includes mission-critical deployments for organizations in South Korea, Bahrain, The United States, Canada, Syria, Mali, Madagascar, Pakistan and Afghanistan — focusing on high-availability systems, disaster recovery, and digital banking enablement.

I combine hands-on technical expertise with a strategic mindset, often collaborating directly with C-level leadership to align IT initiatives with organizational goals.

I hold a broad range of industry-recognized certifications across cybersecurity, cloud computing, IT governance, and emerging technologies. These include the Google Cybersecurity Professional Certificate, AWS Certified Solutions Architect, ITIL 4 Foundation, and ISO/IEC 27001 Information Security Management, among others. My credentials reflect a strong foundation in system governance, cloud architecture, information security, and block chain technologies, ensuring compliance with industry standards and best practices.

I am excited by opportunities where I can contribute to driving operational excellence, digital transformation, and infrastructure modernization. I would welcome the chance to discuss how my background aligns with your team's needs.

Thank you for considering my application.

Sincerely,
